total protection™ email services

Our Total Protection™ Email Service combines the power of built-in Sophos Anti-Virus with our own SpamShield Pro to keep unwanted and harmful email away from your Inbox.

SpamShield Pro

SpamShield Pro provides powerful, user adjustable control over spam and provides always-on protection. SpamShield Pro is fully integrated into our messaging architecture enabling us to provide unique solutions such as our email fingerprinting technology that prevents “bounce storms”. Our SpamShield Pro features include:

- **Automatically blocks sources of spam attacks** – Intelligent monitors ban specific IP addresses where spam originates.
- **BounceShield** – Reject bogus return messages.
- **Selectable Sensitivity setting** – Adjust the criteria that SpamShield Pro uses to identify spam.
- **Move spam to user selectable folder** – Automatically send spam to a folder of your choice.
- **Hide images in messages** – Block offensive graphics, and bugs used by spammers to track your activity.
- **Insert SpamShield Score into message header** – Works with popular email programs such as Outlook, Netscape, Eudora and others.
- **Approved Senders List** – White list trusted email addresses or entire domains.
- **Only accept email from Approved Senders** – Instantly turn your Approved Senders list into a green list.
- **Blocked Senders list** – Blacklist and bounce messages from spammers.
- **SpamShield Pro Actions menu** – Quickly Block or Approve Senders in Web Mail.
- **SpamShield Pro Score Column** – Sort messages in Web Mail based on their likelihood to be spam.

Anti-Virus Protection by Sophos

With new virus threats being discovered every week, you need email protection that’s always up-to-date. echoMountain’s Total Protection™ Email Services include fully integrated, always up-to-date Anti-Virus technology powered by Sophos, a global leader in anti-virus solutions for business.

total protection™ email services

Standard Features

- **100% Uptime providing 24x7 High-Performance Availability** – Our load balanced, secure, clustered email environment provides 24x7x365 uptime, ensuring your email is always up and running. Our email infrastructure has been developed based on a stringent security methodology that deploys sophisticated and redundant firewalls to screen network traffic.
- **IMAP, POP, and SMTP** – Use your favorite email program with our POP and IMAP services. POP is great for users on a single computer; all your messages are downloaded to your email program’s inbox, such as Microsoft Outlook. IMAP gives incredible flexibility for those who use more than one computer and want to have the latest copy of their email wherever they are. With IMAP, all email is backed up on our servers. Our SMTP services give you access to send email from email software without having to worry about using the network approved SMTP server.
- **Web Mail** – All of our mailboxes come with Web access from virtually any computer connected to the Internet. Our robust Web Mail features include email notification, folders and sub-folders, address book, email forwarding, HTML email capability, account status reminder, message search, aliases, and reply addresses.
- **Self Management** – You can easily manage your users for your domain at any time from any Internet-enabled computer using our Mail Control Center, our web-based administration tool.
